

UTHPALA J SHETTY

Java Backend Developer | Java 17 · Spring Boot 3 · Microservices · Kafka · PostgreSQL · AWS
+91-9141161838 | uthpalajshetty@gmail.com | Bengaluru, India | linkedin.com/in/uthpala-j-shetty-37141521a

PROFESSIONAL SUMMARY

Java Backend Developer with 4 years of experience building Spring Boot 3 microservices at Mercedes-Benz Research and Development, specializing in event-driven systems (Apache Kafka/Amazon MSK), PostgreSQL and Oracle data layers, legacy-system modernization, and CI/CD on AWS and Kubernetes. Writes clean, well-tested, secure code. Served as Proxy Project Lead for a 12-member Agile team across 4 Program Increments.

TECHNICAL SKILLS

Languages: Java 17 (Core Java, OOP, Collections, Exception Handling), SQL, TypeScript

Frameworks: Spring Boot 3, Spring MVC, Spring Data JPA, Hibernate, Spring WebFlux, Spring Batch, Spring Validation, Spring Actuator

APIs & Architecture: RESTful API Design, Microservices, Event-Driven Architecture, OpenAPI/Swagger, OpenFeign, WebClient, ProblemDetail error handling

Data: PostgreSQL, Oracle, SQL Query Optimization, Database Modeling, Flyway, Redis, OpenSearch

Messaging & Cloud: Apache Kafka, Amazon MSK, AWS (EC2, S3, ECS Fargate, Lambda, Secrets Manager, CloudWatch, CodeArtifact)

Testing & Quality: JUnit, Mockito, Spring Boot Test, Cucumber/Gherkin, MockWebServer, JaCoCo, SonarQube/SonarCloud, Coverity

DevOps & Security: Gradle, Git, GitHub Actions, Jenkins, Docker, Kubernetes, OAuth2, mTLS, Secure Coding, DevSecOps

Other: Angular, RxJS, NgRx (2 years); Agile/Scrum, SAgE 6; GitHub Copilot

PROFESSIONAL EXPERIENCE

Java Backend Developer — Mercedes-Benz Research and Development

Aug 2022 – Present

Java 17, Spring Boot 3, Hibernate/JPA, PostgreSQL, Oracle, Apache Kafka, Amazon MSK, AWS, Kubernetes

System Control Modernization | Jul 2026 – Present

- Helped modernize a legacy **Java EE and Swing enterprise application into an Angular and Spring Boot REST architecture**, migrating System Control workflows such as benchmark clusters, benchmark exclusions, and strategic order simulation.
- Built Oracle-backed simulation APIs with paginated filtering and multi-sheet XLSX export, preserving legacy business rules and shared-database compatibility through OpenAPI contracts, transaction handling, and focused tests; used GitHub Copilot to speed up legacy-code analysis.

Vehicle, Contract and Product Platform | Aug 2022 – Jun 2026

- Designed, built, and maintained Java 17/Spring Boot 3 microservices and REST APIs for contract generation, product management, and vehicle management, with DTO validation, OpenAPI documentation, and centralized ProblemDetail error handling for consistent API contracts across services.
- Served as **Proxy Project Lead for a 12-member Agile team** across 4 Program Increments, driving sprint execution, leading technical discussions in PI Planning, and coordinating with frontend, QA, and business stakeholders for on-time delivery.
- Re-engineered synchronous inter-service calls into event-driven Kafka/Amazon MSK pipelines across 6+ microservices, **reducing end-to-end processing latency by ~25%**.
- Built persistence layers with Spring Data JPA, Hibernate, PostgreSQL, and Flyway, plus Spring Batch jobs with JDBC process locking for vehicle imports and service-history sync; integrated Redis for caching and rate-limiting and OpenSearch for product search.
- Secured service-to-service integrations (OpenFeign, WebClient) with OAuth2 and mTLS, adding header propagation, timeouts, and downstream error handling for reliability.
- Raised automated **test coverage from ~50% to 80%+** using JUnit, Mockito, Spring Boot Test, and Cucumber/Gherkin, tracked through JaCoCo; maintained zero critical security findings over 4+ release cycles through 100+ code reviews per year with SonarQube and Coverity.
- Built GitHub Actions CI/CD pipelines for builds, Docker images, quality gates, and end-to-end tests, **cutting release time from ~40 min to under 15 min**; containerized and deployed 10+ services on Kubernetes and AWS ECS Fargate, reducing deployment-related incidents by ~30%.
- Delivered full-stack features in Angular/TypeScript (RxJS, NgRx) consuming Spring Boot REST APIs.

Software Engineering Intern — Mercedes-Benz Research and Development

Apr 2022 – Aug 2022

- Built a Python/Selenium tool that monitors incoming emails, extracts attachments, and triggers notification workflows, processing 50+ emails daily and cutting file-retrieval turnaround from hours to under 30 minutes.

CERTIFICATIONS

Certified SAgE 6 Agilist | DevSecOps Grey Belt and White Belt — Mercedes-Benz Internal Security Program | AWS Cloud Technical Essentials — Udemy | Gradle for Java Developers — Udemy

EDUCATION

B.E. in Information Science Engineering — NMAMIT, Nitte | GPA: 9.4/10

2022
